

# Economic Growth Region 8

Statistical Data Report for May 2013, Released July 2013

## Regional and State Unemployment (seasonally adjusted)

Regional and state unemployment rates were little changed in May. Twenty-five states had unemployment rate decreases, 17 states had increases, and eight states and the District of Columbia had no change, the U.S. Bureau of Labor Statistics reported. Forty-one states and the District of Columbia had unemployment rate decreases from a year earlier, four states had increases, and five states had no change. The national jobless rate was essentially unchanged from April at 7.6 percent but was 0.6 percentage point lower than in May 2012.

Nevada had the highest unemployment rate among the states in May, 9.5 percent. The next highest rates were in Illinois and Mississippi, 9.1 percent each. North Dakota again had the lowest jobless rate, 3.2 percent. In total, 21 states had jobless rates significantly lower than the U.S. figure of 7.6 percent, eight states and the District of Columbia had measurably higher rates, and 21 states had rates that were not appreciably different from that of the nation.

## Real Earnings Increase in May

*Excerpted from a Bureau of Labor Statistics report released June 20, 2013)*

Real average hourly earnings for all employees fell 0.2 percent from April to May, seasonally adjusted. This decrease stems from an unchanged average hourly earnings combined with an increase of 0.1 percent in the Consumer Price Index for All Urban Consumers (CPI-U).

**Over-the-month percent change in real average hourly earnings for all employees, seasonally adjusted, May 2012–May 2013**

Source: U.S. Bureau of Labor Statistics.

Real average weekly earnings fell 0.1 percent over the month, the result of a decrease in real average hourly earnings and an unchanged average workweek.

Over the year (May 2012 to May 2013), real average hourly earnings rose 0.5 percent, seasonally adjusted. The increase in real average hourly earnings, combined with a 0.3-percent increase in the average workweek resulted in a 0.9-percent increase in real average weekly earnings over this period.

These earnings data are from the Current Employment Statistics program. Earnings data for April and May are preliminary and subject to revision. To learn more, see “Real Earnings — May 2013” news release USDL-13-1176. The Consumer Price Index for All Urban Consumers from the Consumer Price Index program is used to deflate the “all employees” data.
